

Ranger Remote Control

Giving you control in the classroom

Enhanced whole-class teaching – and learning!

Forget vying with the distractions of the Internet and the noise of furtive fingers flying across keyboards at inappropriate moments during your lessons! Ranger Remote Control gives you instant control in the classroom, enabling you to command all of the attention you want – when or where you want it.

With Ranger Remote Control, you can remotely view and take control of students' PCs – to demonstrate work, interact with individuals or groups, provide support, assess progress and gather feedback – without continually moving from one machine to another.

All of the tools you need, to do more in less time...

Empowering and effective

Ranger Remote Control is intuitive and easy to use, allowing you to feel confident in your ability to use the technology at your disposal, while ensuring that students benefit from a dynamic and stimulating, yet safeguarded, learning environment.

Invaluable monitoring and control

Monitor individual students' machines from your PC and display multiple screens simultaneously for an overview of the whole class – or take control of students' PCs to demonstrate work or to help, if they are not keeping to task.

Ranger Remote Control allows you to restrict access to particular Web sites or applications, such as the spell-checker during English lessons and the calculator in maths. You can also gain the immediate attention of the whole class, by instantly locking all screens and keyboards or blocking all Internet access – at the click of a button.

Benefits

- Save time and effort during lesson preparation and delivery.
- Keep a watchful eye on what students are working on.
- Take control of students' PCs, to demonstrate work or provide assistance.
- Control which applications and Web sites students have access to during classes.
- Immediately block all Internet access at the click of a button.
- Instantly lock all workstation screens and keyboards to get the attention of the whole class.
- Record and replay students' screen activity, to illustrate a point, facilitate assessment or demonstrate progress.
- Provide discreet student support through instant pop-up messages, 'Chat' and 'Help' requests – or by taking control of individual PCs.
- Intuitive interface means that teachers of all technical abilities can feel confident using Ranger Remote Control.

Enhanced teaching and support tools

With Ranger Remote Control, you can interact with individual students, groups or the whole class, without leaving your desk or taking your eye off other students!

You can broadcast your own screen or that of a student, to display work or replay students' screen activity, to highlight areas of difficulty and even provide discreet one-to-one support via instant messaging and 'Help' features.

Optimal assessment and organisation

You can use Ranger Remote Control to set and administer tests, gather feedback through instant surveys and dynamically group students based on their responses. Ranger Remote Control also gives you the option of creating fully automated lesson plans and of distributing and collecting work automatically – all of which saves you time and effort.

Helping you to help yourself...

The right choice

When it comes to specific requirements for your school or college, you're the expert – we just provide you with the tools to help you to achieve your network management objectives, in the most effective way possible.

Ranger offers a comprehensive portfolio of products, to simplify and enhance your basic network – and you're free to select the best combination to suit your specific needs.

So, there isn't one 'right' way of doing things – just the right choice of partner...

But don't take just our word for it!

"Using Remote Control, teachers are able to limit access in their classrooms to applications, Internet sites or even computers. I'd have no hesitation in recommending the entire Ranger suite of applications."

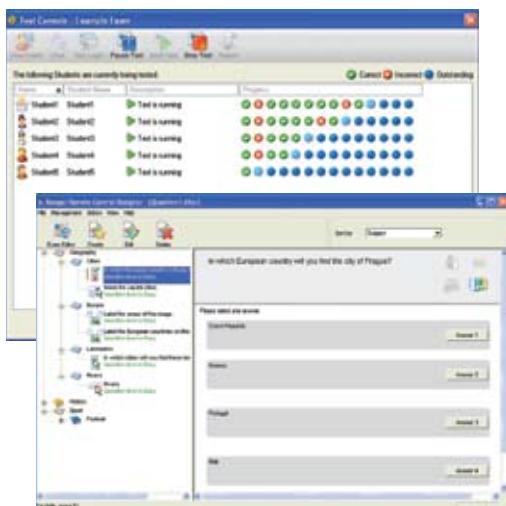

Steve Smith, ICT Network Manager, Oxclose Community School, Tyne and Wear

"Ranger Remote Control has replaced NetOp as our classroom-monitoring software. Members of staff have, so far, experienced little difficulty in the conversion process."

Colin Thomas, IT Network Administrator, Rossall School, Lancashire

"We've set up Ranger Remote Control in each of our computer rooms to allow teachers to praise the efforts of individual students by displaying work on the interactive whiteboard. You can also spot and help students in difficulty and manage the classroom, eg by making all PCs inaccessible while you are talking to the class. This has been a big hit with our teaching staff."

Anthony Nutbeam, Assistant Principal and Director of Networks, Astor College, Kent
