

Your rules

Ranger software is available as a comprehensive suite or as stand-alone products, so you choose the best solution for your school. Products within the Ranger suite of software include:

Ranger for Networks – Giving you fast and flexible control over your ICT network

Ranger for Networks provides management and security software which sits alongside your current Microsoft operating system. It enables you to run a secure, flexible and cost-effective network, without compromising users' performance or productivity. It enhances the standard Microsoft policies to simplify network security, control applications and identify network threats.

Ranger Outpost – The simple to use, cost effective, home working solution

Ranger Outpost provides a safe, reliable and easy-to-use remote access solution, allowing staff and students to log in to their "My Documents" and shared areas from any internet-connected PC. It gives access to your files from anywhere, with no additional hardware and works alongside (or as a backup to) your VLE or Learning Platform.

Ranger Remote Control – Giving teachers control in the classroom

Ranger Remote Control gives teachers the ability to remotely watch, record, share or control their students' PCs. It's used to demonstrate work, interact with the class, provide support and gather feedback – without continually moving from one machine to another. This empowers teachers and frees up technical staff to concentrate on network-management issues.

Ranger Print Manager – Control and monitor rising printing costs

Ranger Print Manager lets you control, monitor and forecast printing across your network. It allows you to give teachers and pupils a set number of printing "credits" and therefore makes staff and students accountable for their use of resources. You can also audit details by individual, or by printer and for a school with an annual print expenditure of £10,000, Ranger Print Manager could pay for itself in less than 75 days.

"For us, Ranger for Networks is like having another full-time member of staff – it's invaluable."

"The tools within Ranger for Networks really help save us time and money."

Giving you flexible control over ICT at your school

Designed specifically for education, Ranger provides everything you need to manage your ICT network and improve the effectiveness of technology in the classroom.

Ranger delivers a complete, yet flexible, ICT network-management solution. It enables you to control and administer your network, provide enhanced security and offer remote access as efficiently and cost-effectively as possible. Ranger also provides classroom management tools to enhance teaching and learning.

Ranger lets you make the best use of your time, while ensuring that teachers are empowered to control ICT in the classroom and students are supported by a reliable, appropriate and safe operating environment.

- simplify network management and administration
- reduce the risk of PC abuse and misuse
- improve network security and control
- reduce time spent on routine network-management activities
- use ICT to enhance teaching and learning
- reduce power consumption
- designed specifically for education
- used in over 2,000 UK schools and colleges
- works with the latest Microsoft operating systems
- scalable for all sizes of education network
- simple to install and easy to operate
- requires no new hardware.

“Simplicity is the key benefit for any school installing Ranger software. Ranger makes it possible to standardise an entire system, which subsequently enables teachers to work more efficiently.”

Simplified network management

- Delegate and automate network management tasks
- Simplify user group set-up, configuration and passwords
- Simplify PC and network lock-down and security
- Streamline software installation and roll-out
- See a user-friendly, real-time view of everything that is happening on your network.

Stability

- A stable and reliable network for your school
- Give pupils a consistent Windows environment, similar to what they use at home
- Give the school a consistent and supported network, even if IT staff change
- Users are given an appropriate interface for their role and age every time they log in
- A proven solution: used in over 2,000 UK schools and colleges.

Enhanced teaching and learning

- Appropriately configured workstations help maintain focus in the classroom
- Standard Windows look and feel ensures consistency between the home, school and workplace
- Take control of students' PCs to demonstrate work, check progress or provide support
- Restrict access to certain programs and websites
- Enable students to access files and submit homework remotely
- Help teachers plan lessons, administer tests and conduct instant surveys.

Security

- Protect your network from malicious or accidental misuse
- Prevent access to secure network areas
- Give secure remote access to specific files and shared areas
- Monitor and log activity on your network, at all times
- Restrict access to applications and websites, by user, lesson, workstation or time of day.

Flexibility

- Control all aspects of network management – simply, or in as much detail as required
- Use Ranger independently or to build and enhance current Microsoft policies
- Manage your network from the server or any network-attached workstation
- Purchase the modules you need, from a range of expert partners.

Cost saving & sustainability

- Plan and control printing costs
- Cut electricity costs by automatically turning off all PCs at the end of the day
- Identify and reallocate underused workstations
- Reduce IT staff costs
- Foster a culture of responsible printing and PC use.
